Abolition of Chemical disinfection for plague infected houses

From

The Sanitary Commissioner

No. 3319 Dated 13.2.14 Received 14.2.14

Diary No. 4601	Enclos.	Spare Copies.	Serial No. 1

BRIEF ABSTRACT OF LETTER.

Recommends the discontinuance of chemical disinfection and to replace the same by desiccation by the use of neem leaves

NOTES AND ORDERS.

The method of chemical disinfection has been replaced by desiccation, lime-washing and the use of Kerosene oil emulsion. The frontier villages are disinfected by the above methods (vide correspondence ending with Letter No. 732 dated 25.7.08 from the 1st Asst to the Hon'ble the Resident in Mysore)

NOTES—First Sheet.

GPB—35,000—15 6-12

Serial No.

2 It is observed from the Sanitary Commissioners circulars to the Collectors of districts that disinfection by the use of neem leaves supplement dessiccation and the use of Kerosine oil emulsion. In the letter under disposal no mention is made of Kerosine oil emulsion. If neem leaves alone have to be used for disinfection purposes there will be change in the existing method. As regards disinfection of frontier villages any change in the existing method will have to be effected after the approval of the Madras Govt.

3. If approved the Sanitary Commr will be requested to state whether disinfection by dessiccation and Kerosine oil emulsion is also to continue or not.

Submitted for orders.

17.2.14 Draft Letter inviting attention to the Letter of Correspondence & calling for all the particulars on which orders are required.

Draft submitted.

28.2.14 The Sanitary Comr's letter does not give fully & clearly the various methods of disinfection that he would retain for the future, and the measures that he wants to be discontinued. The Correspondence ending with the G. O. of 21.7.1910 shows that Chemical disinfection need no longer

General & Revenue Departments,
B a n g a l o r e .

Sir,

I have the honor to bring to the notice of Government that disinfection by cyllin which is still being carried on in the Bangalore and Mysore Cities and other places is unnecessary and may be done away with. I find that in his letter No. 2311 dated the 4th June 1906 Col. Smyth has recommended that chemical disinfection be confined to pukka houses; but I doubt whether even this is necessary. An efficient Plague disinfectant is one that breaks the chain of infection by the Plague bacillus though the rat and rat flea to man. We must therefore adopt such a method as is proved to break this chain. Cyllin is not a pulicide and its use is therefore unjustifiable. Dry heat on the other hand has a most destructive influence on insect life and further, should neem leaves be used as recommended in my letter No. 2802 dated the 13th January 1914 the dense smoke will search out all lurking places of rats and kill the fleas on them.

I request under the circumstances that definite orders may kindly be passed abolishing altogether the method of disinfection with cyllin and other similar substances.

Sir,

With reference to your letter No. 8507 Sany. 88-13-2 dated the 14th Ultimo, I have the honor to state that rules may be laid down directing that wherever disinfection has to be done in the State the methods shall only be (i) desiccation (combined with fumigation with neem leaves) and (ii) the use of kerosine oil emulsion. Both the methods have, under the standing agreement with the Madras Government to be adopted in the case of frontier villages. But in all other places the use of Kerosine Oil Emulsion may be limited to the exterior surroundings of a house such as drains etc.

I have the honor to be,
Sir,
Your most obedient servant,
